

LIGHT UP THE LIGHT BULB

CIRCUIT CONSTRUCTION KIT

1. Press the button, "Intro" to get to the basic construction screen.
2. Click and drag the "wire" image onto your blue workspace. You will see a small wire on your screen.
3. Click inside one of the red circles, holding your mouse down and dragging to make the wire larger.
4. Use the items available on the left side of the screen to create the circuit shown on the right.
5. A circuit must be a closed loop with no holes or gaps. To turn your circuit on, click the switch (indicated with a red arrow in the picture) to close it!
6. What happened? Did your lightbulb turn on? If not, check to make sure everything is connected!
