

Established in 2005, PCOM Georgia is a private, not-for-profit, accredited institute of higher education dedicated to the healthcare professions. The Suwanee, Georgia, campus is affiliated with Philadelphia College of Osteopathic Medicine, a premier osteopathic medical school with a storied history. PCOM Georgia offers doctoral degrees in osteopathic medicine, pharmacy, and physical therapy and graduate degrees in biomedical sciences, medical laboratory science, and physician assistant studies. Emphasizing “a whole person approach to care,” PCOM Georgia focuses on educational excellence, interprofessional education and service to the wider community. The campus is also home to the Georgia Osteopathic Care Center, an osteopathic manipulative medicine clinic, which is open to the public by appointment. The Wonders of OMM is a workshop designed to introduce viewers to Osteopathic Manipulative Medicine (OMM). This workshop provides an overview of the history of Osteopathic Medicine, and what Osteopathic Manipulative Treatment (OMT) is, along with a demonstration of how to diagnose and treat with OMT. We hope that after viewing this video you have an understanding of the additional skills that Doctors of Osteopathic Medicine have in their toolbox.

# PCOM Georgia Opportunities Academy • June 27 - July 1

## Join Us for the PCOM Georgia Opportunities Academy

PCOM Georgia's Opportunities Academy is a summer enrichment program primarily for motivated Gwinnett County high school students interested in exploring a wide variety of healthcare professions. Up to 50 students will have the opportunity to learn from PCOM Georgia's osteopathic medicine, pharmacy, physical therapy, physician assistant, and biomedical sciences students and faculty members, along with professionals in the field. Thanks to the PCOM Office of Diversity and Community Partnerships, the Opportunities Academy is a FREE learning event especially for students who identify as Latinx or African-American, and for those traditionally underrepresented in medicine. The target audience is current 9th, 10th, and 1th graders. In the past, participants who have been successful in the program exhibited a passion for science and math, a curiosity about health care, and a calling to care for others. High school students will have the opportunity to learn about healthcare topics, science-based research, team building and collaboration, high school productivity, college and professional school preparation, and virtual presence and etiquette. In addition, they will become familiar with career planning, proper business attire, resume writing and interviewing, financial planning and management, volunteering and so much more! The program will pair carefully selected PCOM Georgia mentors with the high school students who will learn about their mentors' path to a career in health care. Visit [pcom.edu/diversity](https://pcom.edu/diversity) to apply for the PCOM Georgia Opportunities Academy.
